

New Ways of Traveling: Fansinating Spots of Geotourism

The Central Geological Survey (CGS) recommend some interesting and fantastic geotourism to celebrate Chinese New Year. Since 2012, the CGS has published the "creative geological travel", introduce famous landscape and basic geological framework about individual divisions in Taiwan. A well-known handbook "A geotourism guide brochure", with easy-to-understand terms and photos printed, describe hundreds of places worth visiting. It can not only familiar with the important natural scenery, but also acquainted in-depth of the endemic customs.

They are all easily accessible online. People can obtain relevant information through the Internet as a reference to enjoy travel and add important experience to the Chinese New Year. After reading these introductions, it is believed that people will know more about the origin of our land, from millions to hundreds of years.
